## GEMSTONE SETTING INSTRUCTIONS FOR PRE-NOTCHED CAST SETTINGS

**Adjust your setting to suit the size of your stone by taking the claws out further or bringing them in. With a set of smooth nosed pliers, gently bend the prongs against your gem – do not tighten completely. It's best to work in an "X" pattern (prongs across from each other). Take care with the point (culet). Make sure you keep this protected during setting. Once you are sure your gem is level, tighten the prongs. If using a setting with accent stones, be sure to set them first, before setting your main gem.**

OTHER STYLES AVAILABLE TO ORDER

**BALI BEADS**

Large range of Bali Beads in Sterling Silver and Gold Plated Sterling Silver available POA

**Gemstone Setting Instructions for Snap-Tite or Click-In mountings**

*Just turn the stone face down on a semi-hard surface (a magazine works well), push the mounting down over the gem – until it “snaps”. Check and make sure the stone is level in the setting, and adjust claws and level if necessary. “Gentle” is the key, as too much pressure can twist the setting or damage a valued stone.*
